oxeept for the posts in poolda and Langensalza,

where no VP units have been observed since the time of the VP reorganization.

Comment. The existence of an artillery condendateflung, in addition to the artillery Kommando, is at variance with the organization of other VPDs. Rather, it is believed that there is a signal-communications Sonderabteflung, instead of an artillery Sonderabteflung, although the personnel for this unit were still receiving training at the VP signal-communications school in Pirna in February 1951.
